### Actimove<sup>®</sup> – for you and your patients' needs

Actimove<sup>®</sup> offers a broad portfolio of medically engineered braces and supports for most needs and patient groups, coming in five distinctive ranges. Actimove<sup>®</sup> Professional Line, Actimove<sup>®</sup> Sports Edition, Actimove<sup>®</sup> Everyday Supports, Actimove<sup>®</sup> Arthritis Care and Actimove<sup>®</sup> Kids give patients the confidence to manage their pain and to take on their challenges of daily life.

Actimove's packing design brings a fresh look with high impact into stores. The design also supports easy product choice – for both professionals and those self-selecting.

Drawing on over 80 years of experience in non-invasive orthopedics<sup>1</sup>, Actimove<sup>®</sup> prides itself on providing medical devices that are reliable and thoroughly tested. Actimove<sup>®</sup> braces and supports help to manage pain with excellent functional performance based on biomechanics. They are tested for biocompatibility, are highly comfortable and made from carefully chosen materials. Driven by constant innovation, Actimove<sup>®</sup> keeps working on improving its offers for you.

Actimove<sup>®</sup> is a brand of Essity, a leading hygiene and health company dedicated to improving people's well-being. Actimove<sup>®</sup> stands for trusted products and services to support sustainable business growth.

Whether users are running a marathon, recovering from an injury, overcoming daily arthritis, or recurring pain when moving, they can rely on Actimove<sup>®</sup> to help them with optimized support and pain-relief.

**Actimove<sup>®</sup>. Feel good. Move better.**

## Actimove® ARTHRITIS CARE

Soothing warmth for pain relief

- Aids pain relief for chronic osteoarthritis and rheumatoid arthritis
- Designed to aid in helping to increase mobility
- Ceramic yarns retain and reflect body heat
- Validated compression for support and stability
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.

## Actimove® SPORTS EDITION

Keep cool and dry for great comfort

- Aids pain relief after acute sports injuries
- For the active younger people
- To help prevent re-injuries
- Made with COOLMAX® AIR Technology

## Actimove® KIDS

Especially for kids

- Aids pain relief after acute injuries after play and sports
- Designed for children
- Includes products with COOLMAX® AIR Technology
- Neoprene-free, suitable for those sensitive to latex, as this product is not made with natural rubber latex.

## Actimove® EVERYDAY SUPPORT

Stability for daily mobility

- Aids pain relief in chronic degenerative joint diseases
- Designed for those looking for stability
- Medical compression to help reduce edema
- Motion-Comfort-Zone for sensitive areas
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex

## Actimove® PROFESSIONAL LINE

Excellent functionality for pain relief

- Physician recommended or prescribed
- For professional treatment of acute injuries, post-op use and rehabilitation of chronic orthopedic issues
- Pain relief from functional design based on biomechanics
- Control and guide joint movement
- Support - Stabilize - Immobilize

## Actimove® SPORTS EDITION

Younger, sporty people often wear neoprene braces & supports after sports injuries or to prevent re-injury. A major complaint about these is that they are too hot to wear and cause excessive sweating.<sup>1</sup>

Actimove® Sports Edition aids pain relief and healing through balanced warmth and medical compression. They offer great comfort from excellent moisture management and skin-friendly materials.

- Made with COOLMAX® AIR<sup>2</sup> technology, Actimove® Sports Edition is engineered for quick drying and exceptional breathability to keep people cool and dry.
- The perforated performance material of Actimove® Sports Edition is neoprene-free, friendly to the skin, and suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Furthermore, validated compression properties for support and stability help reduce swelling and manage pain relief.

<sup>1</sup> Essity End-User Validation Research 10/2012; n= 400 OSG shoppers in USA

<sup>2</sup> COOLMAX® AIR is a trademark of The LYCRA company

## Actimove® Wrist Support

Adjustable

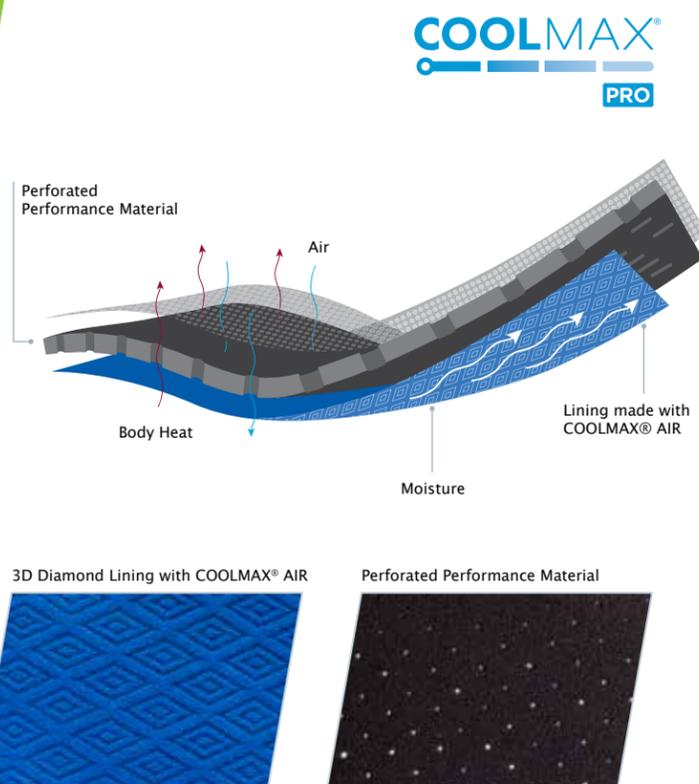

Durable, adjustable support for weak or injured wrists

- Pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Adjust the level of support for comfort no matter the activity.
- Allows for comfortable, dry hands based on the open palm design.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal sizing.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the wrist.

Fields of application include:

- Weak or injured wrist
- Overuse syndromes
- Mild sprains and strains
- Arthritis
- Support during everyday activities

3D Diamond Lining with COOLMAX® AIR

Code	Size	Measurements	Color
7562610	Universal	5 1/2" - 8" / 14 - 20 cm	Black

# Actimove® Wrist Support\*

Elastic Wrap Around

**Firm and adjustable support, padded for comfort for aching and fatigued wrists**

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Firm and adjustable support from powerful elastic strap no matter the activity.
- Comfortable to wear because of terrycloth padding.
- Universal sizing.
- Can be worn left or right.
- Contains latex.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the wrist.

Fields of application include:

- Weak, aching and fatigued wrists
- Support during sports

\*Caution: This product contains natural rubber latex which may cause allergic reactions.

# Actimove® Wrist Stabilizer

Removable Metal Stay, Left or Right

**Anatomically shaped stay for secure stabilization, managing sprains and strains**

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Stabilizes wrist through an anatomically shaped removable stay for left and right hand application.
- Quick and easy to fit with slip-on design and individually adjustable straps.
- Special comfort in a premium soft material and seamless design.
- Can be easily worn under clothing due to low profile.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in three sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the wrist.

Fields of application include:

- Tendonitis
- Sprains, strains, soft tissue injuries
- Osteoarthritis
- Rheumatoid arthritis
- Post-operative care
- After cast removal

# Actimove® Thumb Stabilizer

## Extra Stays

Anatomically shaped stays, managing thumb injuries, keeping finger dexterity

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Stabilization of the thumb through two integrated anatomically shaped stays.
- Comfortable to wear because of premium quality soft material.
- Firm and adjustable wrist support from powerful elastic strap.
- Full finger movement and hand dexterity from special open design.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in two sizes.
- Comes in black or beige.
- For stock keeping, long shelf life of five years.

This product is intended to provide support/stabilization to the thumb and wrist.

Fields of application include:

- Mild to moderate strains and sprains (e.g., skier's thumb)
- Inflammation
- Onset of osteoarthritis
- Thumb pain from repetitive motion activities, like texting or gaming

# Actimove® Patella Strap

## Adjustable

Targeted patella pain relief that stays in place

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Targeted pain relief by increased pressure on patella tendon from the high density EVA shaped insert.
- Stays in place under activity due to silicone dot lining.
- Adjust the level of support, for comfort no matter the activity.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal sizing.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support/stabilization to the patella including lateral tracking.

Fields of application include:

- Patella tendonitis
- Patellofemoral pain syndrome
- Chondromalacia patella
- Osgood-Schlatter disease

# Actimove® PF Knee Brace – Lateral Support

Simple Hinges, Condyle Pads, J-shaped Buttress

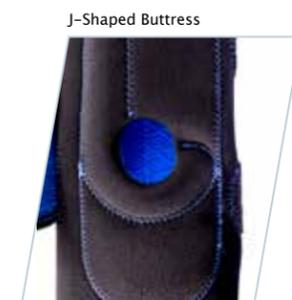

**Sleeve design with special lateral patellar femoral support, simple hinges for extra stability**

- Pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Lateral patellar support and stabilization using special angled straps combined with the "J" shaped buttress.
- Supports side-to-side knee stability through medial and lateral hinges.
- Easy application with convenient finger-loops.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in seven sizes.
- For stock keeping, long shelf life of five years.

This product is intended to stabilize the knee.

Fields of application include:

- Chondromalacia patella
- Lateral pressure syndrome pain
- Patellar instability
- Lateral dislocation
- Lateral patellofemoral mal alignment

# Actimove® Ankle Support

Slim fit sleeve for shoes

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Fast & easy slip on style.
- Comfortable slim-fit with flat seams for shoes.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- Available in black or navy.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the ankle.

Fields of application include:

- Painful ankle injuries & prevention
- Mild sprains
- Weak ankles
- Swelling and tenderness

# Actimove® Ankle Support

Adjustable

Stays in place through conforming heel loop, adjustable for stability

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Stays in place with conforming elastic heel loop.
- Adjust the level of support, for comfort no matter the activity.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal sizing.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the ankle.

Fields of application include:

- Painful ankle injuries & prevention
- Mild sprains
- Weak ankles
- Swelling and tenderness

# Actimove® Ankle Stabilizer

## Criss-Cross Straps

Simulating sports taping, increased stability for ankle and arch of foot

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Increased stability around the ankle and arch of foot with criss-cross straps simulating sports taping.
- Stays in place during athletic activity with extra support from circular strap.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal sizing.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support/stabilization to the ankle.

Fields of application include:

- Mild and moderate ankle sprains
- Sports injuries
- Helps to avoid re-injuries and chronic ankle instabilities

# Actimove® Back Stabilizer

Rigid Panel with Pressure Pads

SMART Easy-Closing-Pulley-System

Easy to apply and adjust, relieving massage for lower back pain

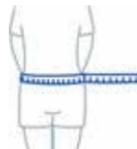

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free perforated performance material.
- Easy and simple to apply and adjust the compression with just one thumb using the SMART Easy-Closing-Pulley-System.
- Additional strength and stability for the lumbar region through rigid back panel.
- Relieving massage effect through prominent, removable pressure pads.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and stabilization to the lumbar joints of the back.

Fields of application include:

- Acute and chronic lower back pain
- Degenerative back problems (e.g., spondylosis)
- Lumbar instabilities (e.g., muscular insufficiencies)
- Post-operative care and rehabilitation

# Actimove® Shoulder Support

Extra Pocket for Optional Hot/Cold Pack

Adjustable support and protection for shoulder injuries and painful conditions

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Extra pain relief when optional hot/cold therapy pack is placed in build-in pocket.
- Supports and protects the shoulder while allowing flexibility.
- Adjustable chest and arm closure for a custom fit.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in three sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to shoulder.

Fields of application include:

- Slight shoulder instabilities
- Degenerative shoulder conditions
- Tendomyopathies
- Shoulder sprains / strains
- After arthroscopy

Pocket for Optional Hot/Cold Pack

## Actimove® EVERYDAY SUPPORTS

With age, patients frequently suffer from chronic degenerative joints diseases, impacting how they are able move. They are looking for stability to support their mobility.

Actimove® Everyday Supports provides medical compression that helps to reduce edema and aids pain relief. Its enduring comfort is combined in a range of reliable and durable supports.

- **Validated compression** properties provide support and stability which helps to reduce swelling and manage pain relief.
- The **unique helix design** is inspired by physiological taping and the supports are anatomically shaped for stability.
- Made from soft yarns, Actimove® Everyday Supports have special **comfort zones** for sensitive areas. Further, the products are suitable for those sensitive to latex, as this product is not made with natural rubber latex.

## Actimove® Wrist Stabilizer Carpal

Pre-shaped Metal Stay

**Anatomical shape for correct positioning, full finger movement and hand dexterity**

- Pain relief and healing are supported through balanced warmth and medical compression.
- Helps to manage pain by stabilizing wrist with anatomically shaped stay for correct positioning.
- Provides relief as hand can rest on palmar pad supported by rigid, angled stay.
- Full finger movement and hand dexterity from unique open design.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal sizing.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended for wrist support.

Fields of application include:

- Symptomatic relief of carpal tunnel syndrome, e.g., while using a computer

Open Design for Dexterity

	Code	Size	Measurements	Color
	7571420	Universal	5 1/2" - 8" / 14 - 20 cm	Black

## Actimove® Mild Knee Support

Lightweight design, easy to apply

- Mild support and easy application due to lightweight design.
- Knitted design supports good fit while maintaining flexibility.
- Soft yarns for comfort.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the knee.

Fields of application include:

- Slightly swollen and aching knees

# Actimove® Lumbar Sacral Support

Low-profile support and compression to the lumbar region with asymmetrical wings for a contoured fit.

- Helps to reduce pain through support and compression to the lower back area.
- Contoured fit through its asymmetrical wings.
- Comfortable to wear even when sitting as flexible stays help to maintain positioning of the belt.
- Easy application and removal through wrap-around design.
- Enhances proprioception by supporting the back to keep an upright posture.
- Customized fit due to wide range of adjustability in a wrap-around design.
- Smooth, durable surface helps to prevent pilling.
- Suitable for daily routines due to its low-profile, anatomical, and breathable design which can be worn under most clothing.
- Enhanced wearing comfort thanks to its breathable and soft materials.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C / 105 °F wash.
- Suitable for both shorter and taller people as available in two heights.
- Unisex, fits both men and women.
- Available in six sizes.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and stabilization to the lumbar area.

Fields of application include:

- Acute and chronic lower back pain
- Degenerative changes in the lumbar area (e.g., osteoporosis, osteochondrosis, spondylosis, spondylarthrosis, facet syndrome)
- Lumbar instabilities (insufficiencies of muscles and ligaments, sprains and strains)
- Lumbar disc protrusion
- Post-traumatic and post-operative use (e.g., after intervertebral disc operations)
- Prevention of repetitive strain injuries

# Actimove® Back Support

High-Density Foam Panel  
Adjustable Double Layer Compression

## Relieving massage effect, stability for the lumbar region

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free perforated performance material.
- Provides strength and stability for the lumbar region incorporating a tapered high-density foam panel.
- Relieving massage effect through prominent pressure pads.
- Easy to apply and adjustable compression, thanks to the finger pockets and loops.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in two sizes.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and stabilization to the lumbar joints of the back.

### Fields of application include:

- Acute and chronic lower back pain
- Degenerative back problems (e.g. spondylosis)
- Lumbar instabilities (e.g. muscular insufficiencies)
- Post-operative care and rehabilitation

# Actimove® Mild Elbow Support

Lightweight design, easy to apply

- Mild support and easy application due to lightweight design.
- Knitted design supports good fit while maintaining flexibility.
- Soft yarns for comfort.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to support the elbow.

### Fields of application include:

- Slightly swollen and aching elbows

# Actimove® Elbow Support

Firm compression, reliable, durable support for everyday mobility

- Firm compression to help manage pain from elbow conditions.
- Reliable, durable support for everyday mobility.
- Seamless anatomical shape supported by a patterned helix design for a good fit.
- Reinforced edges for long lasting wear.
- Soft and cotton-free yarns for enduring comfort.
- Soft, smooth Motion-Comfort-Zone in the elbow crease.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to support the elbow.

Fields of application include:

- Degenerative elbow conditions
- Overuse or repetitive use syndromes
- Chronic elbow pain

# Actimove® Elbow Support

Pressure Pads and Strap

Firm compression, adjustable pressure, durable support for added pain relief

- Firm compression to help manage pain from elbow conditions.
- Two shaped pressure pads create a massage effect for added pain relief.
- Targeted pain relief by adjusting pressure on forearm tendon by extra elastic strap.
- Reliable, durable support for everyday mobility.
- Seamless anatomical shape supported by a patterned helix design for a good fit.
- Soft, smooth Motion-Comfort-Zone in the elbow crease.
- Reinforced edges for long lasting wear.
- Soft and cotton-free yarns for enduring comfort.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to support the elbow.

Fields of application include:

- Degenerative elbow conditions
- Overuse or repetitive use syndromes
- Chronic elbow pain

## Actimove® ARTHRITIS CARE

Individuals suffering from chronic, painful osteoarthritis or rheumatoid arthritis are on a quest to find lasting pain-relief<sup>1</sup> to help them live their daily lives.

Actimove® Arthritis Care supports aid pain relief and increase joint mobility through soothing warmth and compression.

- Actimove® Arthritis Care are made with **special ceramic yarns** which retain and reflect body heat.
- **Validated compression** properties provide support and stability, helping to reduce swelling, increase joint mobility and help to manage pain.
- The **skin friendly materials** are soft and comfortable and suitable for those sensitive to latex, as this product is not made with natural rubber latex.

### CERAMIC YARNS RETAIN AND REFLECT BODY HEAT

<sup>1</sup> Essity Internal Shopper Study

## Actimove® Wrist Support

Soothing warmth for wrists from heat-retaining ceramic fibers

- Unique ceramic fibers retain and reflect body heat for soothing warmth to help relieve pain.
- Four-way stretch provides light, comfortable compression to reduce swelling for improved mobility.
- Therapeutic warming promotes circulation around the wrist for faster return to daily activities.
- Specially designed Flex-Zones offer higher elasticity for more comfort during joint movement.
- Flex-Zones aid proper placement of the support on the joint.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and therapeutic warmth to the wrist.

Fields of application include:

- Painful arthritis of the wrist joint

## Actimove® Arthritis Gloves

Balanced warmth and medical compression, comfortable from outer seams

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Provides light compression to help reduce swelling for improved finger and hand mobility.
- Comfortable to wear because of premium soft material and outside seams.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended for arthritis of the hand.

Fields of application include:

- Arthritis
- Aching fingers and hands
- Overuse or repetitive use syndromes

	Code	Size	Measurements	Color

## Actimove® Knee Support

Soothing warmth for knees from heat-retaining ceramic fibers

- Unique ceramic fibers retain and reflect body heat for soothing warmth to help relieve pain.
- Four-way stretch provides light, comfortable compression to reduce swelling for improved mobility.
- Therapeutic warming promotes circulation around the knee for faster return to daily activities.
- Specially designed Flex-Zones offer higher elasticity for more comfort during joint movement.
- Flex-Zones aid proper placement of the support on the joint.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and therapeutic warmth to the knee.

Fields of application include:

- Painful arthritis of the knee joint

## Actimove® Ankle Support

Soothing warmth for ankles from heat-retaining ceramic fibers

- Unique ceramic fibers retain and reflect body heat for soothing warmth to help relieve pain.
- Four-way stretch provides light, comfortable compression to reduce swelling for improved mobility.
- Therapeutic warming promotes circulation around the ankle for faster return to daily activities.
- Specially designed Flex-Zones offer higher elasticity for more comfort during joint movement.
- Flex-Zones aid proper placement of the support on the joint.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Can be worn left or right.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and therapeutic warmth to the ankle.

Fields of application include:

- Painful arthritis of the ankle joint

# Actimove® KIDS

Many children suffering from play or sport injuries may not like to wear supports, because most available neoprene made options may be too hot.

Actimove® Kids offers pain relief and healing through balanced warmth and medical compression. Kids will enjoy great comfort from skin-friendly materials offering excellent moisture management.

- Made with COOLMAX® AIR<sup>1</sup> technology, Actimove® Kids are engineered for quick drying and exceptional breathability to keep children cool and dry.
- The perforated performance material of Actimove® Kids is neoprene-free, friendly to the skin, and suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Furthermore, validated compression properties for support and stability help reduce swelling and manage pain relief.

<sup>1</sup> COOLMAX® AIR is a trademark of The LYCRA company

# Actimove® Wrist Stabilizer

Removable Metal Stay, Left or Right

Anatomically shaped stay for secure stabilization, managing sprains and strains

- Pain relief and healing are supported through balanced warmth and medical compression.
- Comfort and good breathability through neoprene-free performance material.
- Stabilizes wrist through an anatomically shaped removable stay for left and right hand application.
- Quick and easy to fit with slip-on design and individually adjustable straps.
- Special comfort in a premium soft material and seamless design.
- Can be easily worn under clothing due to low profile.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Pediatric sizes, ages 2-7.
- For stock keeping, long shelf life of five years.

This product is intended to provide support/stabilization to the wrist.

Fields of application include:

- Tendonitis
- Sprains, strains, soft tissue injuries
- Post-operative care
- After cast removal

Slip-On Design

# Actimove® Knee Support

Open Patella

Fast, easy and secure protection, relieving patella pain in minor knee injuries

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Helps to relieve patella pain. Knee cap pressure is reduced by open design.
- Feel secure as knee is protected by a snug fit that stays in place.
- Fast & easy slip-on style.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Two sizes, suitable for ages 6-7 and 8-12.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the knee.

Fields of application include:

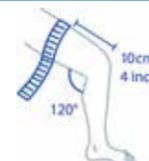

- Painful knee injuries and prevention
- Slight strains, sprains and contusions
- Joint swelling

# Actimove® Ankle Support

Slim fit sleeve for shoes

- Enjoy sports, as pain relief and healing are supported through balanced warmth and medical compression.
- Great comfort with exceptional breathability through quick drying perforated performance material.
- Neoprene-free, made with COOLMAX® AIR technology.
- Fast & easy slip on style.
- Comfortable slim-fit with flat seams for shoes.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Two sizes, suitable for ages 6-10 and 11-15.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the ankle.

Fields of application include:

- Painful ankle injuries & prevention
- Mild sprains
- Weak ankles
- Swelling and tenderness

# Actimove® Mitella

Arm Sling

Colorful support for children

- Child-friendly designed shoulder, elbow and arm support limiting their range of motion with a rested, flexed elbow position.
- Helps to relieve pain by stabilizing the shoulder joint and keeping the flexed elbow in a pocket which limits the range of motion.
- Comfortable fit around the neck.
- Patient comfort thanks to the breathable pocket material.
- Appealing and child-friendly, unique, playful pocket design.
- Convenient for follow up exams, as product does not need to be removed prior to taking x-rays.
- Protects casts or bandaging from moisture and dirt through the pocket.
- Easy to clean for better hygiene, machine washable at 40°C / 105°F.
- Suitable for those sensitive to latex, this product is not made with natural rubber latex
- Available in a universal, pediatric size
- For stock keeping, long shelf life of five years.

The product is intended to provide support to the arm, elbow and shoulder.

Fields of application include:

- Postoperative use (e.g., after rotator cuff rupture)
- Fracture management (e.g., clavicle, scapular, humeral, and greater tuberosity fractures)
- Joint distortions (sprains) and dislocations (e.g., acromioclavicular & sternoclavicular dislocations, shoulder luxation)
- Inflammatory diseases (e.g., calcific tendinitis of the rotator cuff)
- Minor instability of the shoulder (e.g., dorsal instability)
- Support for hemiplegic patients
- Support while wearing a cast or splint
- Temporary arm stabilization in emergency/paramedic care

	Code	Size	Measurements	Color
	7456113	Pediatric	10 <sup>1</sup> / <sub>2</sub> " - 13 <sup>1</sup> / <sub>2</sub> " / 27 - 34 cm	Navy

# Actimove® Cervical

## Cervical Collar

### Child-friendly cervical support

- Holds the head in a stable position thanks to the pre-formed anatomical shape.
- Support of the cervical spine after circular application.
- Provides a precise fit and support thanks to the anatomical design.
- Reliable support due to the durable materials.
- For more convenience and child-friendliness, free of metal buckles and harsh closures.
- Comfortable wear thanks to the low-contour and child-friendly, soft, breathable foam.
- For odor control, made with anti-microbially treated soft foam.
- Easy to apply and adjust hook and loop closures.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in three sizes.
- For stock keeping, long shelf life of five years.

The product is intended to provide support of the cervical spine after circular application, to help hold the head in a stable position and to restrict the neck range of motion.

Fields of application include:  
- Support/stabilization to the cervical area

	Code	Size	Measurements		Unit

## Actimove® PROFESSIONAL LINE

Solutions to help improve the life of your patients supporting you in your everyday work life, the Actimove Professional Line is designed to support the treatment of acute injuries, post-op use and rehabilitation of chronic, orthopedic issues.

A shopper study<sup>1</sup> has shown what the patients' concerns are. The most important one is pain relief - followed by quality and comfort.

### Pain Relief

Actimove Professional Line products provide the right functionality based on biomechanics to help support patients' pain relief.

### Quality

Actimove Professional Line products are tested thoroughly and constantly updated for a high standard of quality and longevity.

### Comfort

Well-fitting products made from carefully chosen materials, paired with the correct sizing ensure patient comfort when it is most needed.

The line comprises a great range of braces and supports - for most needs, ages, and body parts. Actimove pledges to improve its offering further and further through research and innovation. All to give you assurance and help manage your patients' pain and support their movement.

## WRIST & THUMB

# Actimove® Rhizo Forte

## Thumb Orthosis

The patented brace restricting thumb movement while maintaining the functionality of the hand during daily activities.

- Helps to alleviate pain arising from osteoarthritis of the thumb.<sup>1</sup>
- Supports pain relief by placing the thumb in a functional position and immobilizing the carpometacarpal (CMC) and the first metacarpophalangeal (MCP1) joints.
- Improved design for optimized fit and comfort around the thumb.
- For everyday wear, as wrist and fingers are free to move while the thumb is effectively restricted.
- Provides excellent fit and high comfort by customizing anatomical shape.
- Individually adjustable to the palm by molding the aluminum core.
- Maximum wearing comfort thanks to the open, low-profile design.
- Measure the palm width for the correct size.
- Easy to close with one hand using hook & loop straps.
- Easy cleansing of the brace by using hand wash.
- For easy daily hygiene: Water-resistant brace dries quickly after hand washing.
- This orthosis can even be worn when in contact with food.<sup>2</sup>
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Protected by patent, see [www.essity.com/patents](http://www.essity.com/patents).
- Available in three sizes.
- Available in gray and black.
- For stock keeping, long shelf life of five years.

This product is intended to provide immobilization of the thumb.

Fields of application include:

- Thumb osteoarthritis
- Rheumatoid arthritis of the thumb
- Ulnar collateral ligament injuries of the MCP 1 joint (e.g., skier's thumb)
- Instability of the CMC joint
- Soft tissue injuries (sprains)
- Traumatic thumb dislocation
- Ligament instabilities
- Postsurgical and nonsurgical treatment

## Wrist Support

Anatomically shaped wrist support featuring 3D knitting technology and award-winning helix design for medical compression providing stability with integrated pressure pad to help pain relief.

- Supports pain relief and healing by stabilizing the wrist in a physiological position through the anatomically shaped, thermoplastic stay and pressure pad.
- Helps to support pain relief by stabilizing the wrist through the 3D flat-knitted structure providing compression.
- Added stability thanks to the circumferential, inelastic wrist band that is adjustable and fully removable.
- Contributes to healing by reducing edema, effusions, and hematoma, thanks to the anatomically shaped dorsal pressure pad for a targeted intermittent massage effect.
- For more wearing comfort especially designed soft, smooth Motion-Comfort-Zone helps to prevent wrinkling in the thumb opening area and allows it to move.
- Prevents further pressure peaks on bony prominences thanks to the cut-outs in the dorsal pressure pad.
- Anti-slip for pressure-reduced distal and proximal cuffs without an elastic band preventing constriction.
- Seamless look thanks to the fusion technology used for the integration of the pressure pad.
- Easily removable stay placed in a pocket using seamless fusion technology for fixation on the outer side of the wrist.
- Skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Easier application thanks to the included donning aid.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30 °C / 85 °F gentle wash cycle.
- Available in six sizes
- Available in white and charcoal.
- For stock keeping, long shelf life of five years.

Donning Aid included.

This product is intended for wrist support.

Fields of application include:

- Painful arthrosis
- Rheumatoid arthritis of the wrist
- Distortions (sprains)
- Tendovaginitis
- Tendon injuries
- Ligament injuries
- Soft tissue injuries
- Posttraumatic irritations
- Postoperative use

## Wrist Brace

Highly comfortable, reliable brace for the immobilization of the wrist.

- Supports pain relief by strongly and securely stabilizing the wrist in a functional position, preventing flexion and extension through the combination of the rigid aluminum stay, and the wide, circular, and inelastic middle strap.
- Suitable for everyday wear, the secure-fit-design allows the fingers to move freely while fixating the wrist.
- High wearing comfort thanks to the wide thumb opening with soft edges, allowing for full finger dexterity.
- Easy to apply, handle and remove with one hand due to the tubular slip-on design.
- Additional overall stabilization of the wrist through two stays on the back of the hand.
- Individual fit by molding the anatomically shaped aluminum stay as required.
- Also usable in the late rehabilitation phase, when less stability is needed, by removing the palmar stay.
- For ease of use special security hook & loop closure to prevent straps from slipping out of the buckles.
- High wearing comfort and natural skin climate thanks to the soft, breathable spacer fabric.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30°C / 85°F after palmar aluminum stay is removed.
- Available in three sizes.
- Available for left and right.
- Available in black.
- For stock keeping, long shelf life of five years.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Inflammatory diseases (e.g. De Quervain's tendosynovitis, tendovaginitis)
- Sprains and strains
- Soft tissue injuries
- Osteoarthritis (OA)
- Rheumatoid arthritis
- Post-operative care
- Care after cast removal

## Actimove® Wrist Splint 8"

Full-length wrist splint for secure stabilization, made of breathable open cell foam.

- Helps to reduce pain as wrist is supported in a functional position, preventing flexion and extension through the dorsal stay and the wide, pre-formed removable palmar stay.
- Aids pain relief as functional positioning of the wrist is provided by the wide, pre-formed and removable palmar stay.
- Helps to support pain relief through comfortable stabilization.
- Feel securely supported in a full 8" length splint.
- Additional support to the wrist from the lateral and medial stays.
- Comfortable to wear due to the open cell foam as a breathable alternative to neoprene.
- Individual fit and extra stabilization thanks to the three adjustable, sturdy straps.
- Increased comfort thanks to the large thumb opening.
- Full finger movement and dexterity thanks to the special open design.
- Easy one-hand application thanks to the tubular slip-on design.
- Durable thanks to the binding of the edges.
- Easy to close straps thanks to the curved D-rings.
- For hygiene, hand-washable at 30°C / 85°F.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Available for left and right.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Tendovaginitis (US: tendinitis)
- Sprains and strains
- Soft tissue injuries
- Osteoarthritis (OA)
- Rheumatoid arthritis
- Post-operative care
- Care after cast removal
- Carpal tunnel syndrome (CTS)

## Actimove® Wrist Splint 6"

Short-length wrist splint for comfortable stabilization, made of breathable open cell foam.

- Helps to reduce pain as wrist is supported in a functional position, preventing flexion and extension through the dorsal stay and the wide, pre-formed removable palmar stay.
- Aids pain relief as functional positioning of the wrist is provided by the wide, pre-formed and removable palmar stay.
- Helps to support pain relief through comfortable stabilization.
- Individual fit and extra stabilization thanks to the two adjustable, sturdy straps.
- Additional support to the wrist from the lateral and medial stays.
- More comfortable to wear as the short 6" length is less bulky.
- Comfortable to wear due to the open cell foam as a breathable alternative to neoprene.
- Full finger movement and dexterity thanks to the special open design.
- Increased comfort thanks to the large thumb opening.
- Easy one-hand application thanks to the tubular slip-on design.
- Easy to close straps thanks to the curved D-rings.
- Durable thanks to the binding of the edges.
- Neoprene-free.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- For hygiene, hand-washable at 30°C / 85°F.
- Available in four sizes.
- Available for left and right.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Tendovaginitis (US: tendinitis)
- Sprains and strains
- Soft tissue injuries
- Osteoarthritis (OA)
- Rheumatoid arthritis
- Post-operative care
- Care after cast removal
- Carpal tunnel syndrome (CTS)

# Actimove® Wrist Brace

Suede Finish, Lace-Closure

Soft suede-finish wrist brace with easy single pull lace-closure

- Helps to reduce pain as wrist is supported in a functional position, preventing flexion and extension through the dorsal stay and the wide, pre-formed removable palmar stay.
- Aids pain relief as functional positioning of the wrist is provided by the wide, preformed, and removable palmar stay.
- Prevents flexion and extension through the anatomically designed palmar and dorsal stays.
- Extra comfortable to wear thanks to the perforated suede-finished material.
- Easy one-hand application thanks to the tubular slip-on design combined with the lace-pully closure system.
- Soft and even fit with conforming lace closure.
- Full finger movement and dexterity thanks to the special open design.
- Neoprene-free.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Available for left and right.
- Available in black and beige.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Tendovaginitis (US: tendinitis)
- Sprains and strains
- Soft tissue injuries
- Osteoarthritis (OA)
- Rheumatoid arthritis
- Post-operative care
- Care after cast removal
- Carpal tunnel syndrome (CTS)

## Wrist & Thumb Brace

Highly comfortable, reliable brace for the immobilization of the wrist and thumb.

- Supports pain relief by strongly and securely stabilizing the wrist in a functional position, preventing flexion and extension through the combination of the rigid aluminum stay, and the wide, circular and inelastic middle strap.
- Helps to alleviate pain as the thumb is immobilized by the rigid aluminum spica stay.
- Suitable for everyday wear, the secure-fit-design allows the fingers to move freely while fixating the wrist.
- Easy to apply, handle and remove with one hand due to the tubular slip-on design and the simple to adjust thumb closure.
- Additional overall stabilization of the wrist through two stays on the back of the hand.
- Individual fit by molding the anatomically shaped aluminum stay as required.
- Also usable in the late rehabilitation phase, when less stability is needed, by removing the palmar stay.
- For ease of use special security hook & loop closure to prevent straps from slipping out of the buckles.
- High wearing comfort and natural skin climate thanks to the soft, breathable spacer fabric.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30°C / 85°F after palmar aluminum stay is removed.
- Available in three sizes.
- Available for left and right.
- For stock keeping, long shelf life of five years.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Osteoarthritis of the wrist and thumb (e.g., rhizarthrosis)
- Soft tissue injuries of the wrist and thumb (e.g. from repetitive motion activities, like texting or gaming)
- Skier's thumb
- Sprains and strains
- Rheumatoid arthritis
- Post-operative care
- Post-traumatic care
- Inflammatory diseases (e.g., De Quervain's tendosynovitis, tendovaginitis)
- Care after cast removal
- Carpal tunnel syndrome (CTS)

# Actimove® Wrist Splint

## Abducted Thumb, Compression-Formed Composite

Wrist splint with abducted thumb with extra protection through the composite closed cell foam thumb spica.

- Helps to reduce pain through stabilization of wrist and holding the thumb in an abducted, favorable position.
- Helps to reduce pain as wrist is supported in a functional position, preventing flexion and extension through the dorsal stay and the wide, pre-formed removable palmar stay.
- Helps to reduce pain through comfortable compression thanks to soft foam material combined with three adjustable straps.
- Aids pain relief as functional positioning of the wrist is provided by the wide, pre-formed and removable palmar stay.
- Provides extra protection from impact through the durable, semi-rigid composite closed cell foam thumb spica.
- Extra stabilization through the three sturdy straps, combined with an elastic thumb strap.
- Full finger movement and dexterity thanks to the special open design.
- Comfortable to wear without pressure points around the MCP joint thanks to the seamless design.
- Comfortable wear thanks to the light, breathable inner and outer materials.
- Comfortable to wear due to the open cell foam as a breathable alternative to neoprene.
- Durable thanks to the binding of the edges.
- Easy one-hand application thanks to the tubular slip-on design.
- Easy to close straps thanks to the curved D-rings.
- For hygiene, hand-washable at 30 °C / 85 °F.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Available for left and right.

The product is intended to provide stabilization/support to the wrist.

Fields of application include:

- Osteoarthritis of the thumb (e.g., rhizarthrosis)
- Soft tissue injuries of the wrist and thumb (e.g., from repetitive motion activities, like texting or gaming)
- Skier's thumb
- Strains and sprains
- Rheumatoid arthritis
- Post-operative care
- Post-traumatic care
- Inflammatory diseases (e.g., De Quervain's tendosynovitis, tendovaginitis)
- Care after cast removal
- Carpal tunnel syndrome (CTS)

## Wrist & Thumb Stabilizer

Secure MCP joint stabilization, removable stay for left or right hand.

- Pain relief and healing are supported by stabilization through anatomically shaped stays.
- MCP joint stabilization through extra thumb stay while allowing full finger movement.
- Great comfort from soft material and contoured strap ends.
- Quick and easy to fit with slip on design and individually adjustable straps.
- Can be applied on left or right hand as palmar stay is removable.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- For hygiene, hand washable at max. 30 °C / 85 °F
- Available in four sizes.
- For stock keeping, long shelf life of five years.

The product is intended to provide support to the wrist and thumb.

Fields of application include:

- Osteoarthritis of the thumb
- Irritation of the thumb
- Skier's thumb
- Sprains, strains
- Rheumatoid arthritis
- Post-operative care
- Post-traumatic care
- DeQuervain's tendosynovitis

## Knee Support

Anatomically shaped knee support featuring 3D knitting technology and award-winning Helix design for gradient medical compression, providing stability through stays, and integrated pressure pad to help pain relief.

- Helps pain relief, as the support offers stability through the anatomical shape and the 3D flat-knitted structure, providing gradient medical compression and a secure fit.
- Contributes to pain relief and healing by reducing edema, through targeted pressure and an intermittent massage effect thanks to the anatomically shaped circular pressure pad.
- For more wearing comfort especially designed soft, smooth Motion-Comfort-Zone that helps to prevent wrinkling in the popliteal area.
- Anti-slip for pressure-reduced distal and proximal cuffs without an elastic band preventing constriction.
- Added stabilization with great mobility thanks to the lateral spiral stays.
- Skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Seamless look thanks to the fusion technology used for the integration of the pressure pad and stays.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30°C / 85 °F gentle wash cycle.
- Available in 15 sizes, including six plus sizes.
- Available in white and charcoal.
- For stock keeping, long shelf life of five years.

The product is intended for knee support.

Fields of application include:

- Chondromalacia with or without recurrent joint swellings
- Gonarthrosis
- Arthritis
- Posttraumatic irritations
- Postoperative use
- Minor instabilities of the knee joint
- Minor meniscal damages
- Fibromyalgia (tendomyopathy)

# Actimove® Knee Brace

## Composite Polycentric Hinges

**Guided knee stabilization through polycentric hinges with built-in stops and additional lateral protection.**

- Helps to reduce pain through warmth and compression.
- Provides additional protection against lateral impacts during activity thanks to the contoured condyle shells.
- Guided stabilization of the knee with polycentric hinges closely tracking the natural range of motion.
- Protects the knee from hyperextension through the built-in hinge stop.
- Supports patella tracking thanks to the contoured double layer neoprene material.
- Long-lasting wearing comfort due to lightweight, durable composite hinge material and design.
- Comfortable and secure fit thanks to the anatomical, tapered neoprene sleeve design.
- For additional comfort, friction and irritation is reduced thanks to the popliteal opening.
- Stays in place with improved fit thanks to the four durable, adjustable support straps.
- Easy to apply and remove slip-on design.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- Can be used both on left and right knee.

The product is intended to stabilize the knee.

Fields of application include:

- Intermediary support for mild to moderate ligament strains/sprains (ACL/PCL)
- Meniscal injuries
- Medial/lateral ligament instabilities and tears
- Hyperextension or chronic knee instability problems

## Ankle Support

Anatomically shaped ankle support featuring 3D knitting technology and award-winning Helix design for gradient medical compression, providing stability, and integrated pressure pads to help pain relief.

- Helps pain relief, as the support offers stability through the anatomical shape and the 3D flat-knitted structure, providing gradient medical compression.
- Contributes to healing by reducing edema, helping to relieve pain through targeted pressure and an intermittent massage effect thanks to the two anatomically shaped medial and lateral pressure pads.
- For more wearing comfort especially designed soft Motion-Comfort-Zone for a smooth fit in the instep.
- Anti-slip for pressure-reduced distal and proximal cuffs without an elastic band preventing constriction.
- Easier application thanks to the included donning aid.
- Seamless look thanks to the fusion technology used for the integration of the pressure pads.
- For long lasting wear, the heel and sole area is reinforced and strengthened by a special knitting structure to help prevent material abrasion.
- Skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30 °C / 85 °F gentle wash cycle.
- Available in six sizes.
- Available in white and charcoal.
- For stock keeping, long shelf life of five years.

This product is intended for ankle support.

Fields of application include:

- Acute lateral ligament injury (ruptured ligaments in ankle joint)
- Acute ankle sprain
- Acute chronic and inflammatory edema (e.g., in arthrosis or arthritis)
- Chronic ankle instability
- Postoperative use
- Posttraumatic irritation (e.g., after distortions)

Donning Aid included.

# Actimove® AchilloMotion

## Achilles Tendon Support

Anatomically shaped Achilles tendon support featuring 3D knitting technology and award-winning Helix design for gradient medical compression, providing stability, and integrated pressure pads to help pain relief.

- Helps pain relief, as the support offers stability through the anatomical shape and the 3D flat-knitted structure, providing gradient medical compression.
- Contributes to healing by reducing edema, helping to relieve pain through targeted pressure and an intermittent massage effect thanks to the two anatomically shaped pressure pads parallel to the Achilles tendon.
- For more wearing comfort especially designed soft Motion-Comfort-Zone smooth fit in the instep.
- Anti-slip for pressure-reduced distal and proximal cuffs without an elastic band preventing constriction.
- Easier application featuring a donning aid in combination with a slanted upper cuff.
- Seamless look thanks to the fusion technology used for the integration of the pressure pads.
- For long lasting wear, the heel and sole area is reinforced and strengthened by a special knitting structure to help prevent material abrasion.
- Additional relief to the Achilles tendon due to the firm, viscoelastic heel wedges that are re-usable after cleaning with water.
- Easy fixation in flat, closed shoes, as the heel wedges are self-adhesive.
- Skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30 °C / 85 °F gentle wash cycle.
- Available in five sizes.
- Available in white and charcoal.
- For stock keeping, long shelf life of five years.

Donning Aid included. Heel wedges included.

This product is intended for Achilles' tendon support.

Fields of application include:

- Acute and chronic inflammation of the Achilles tendon
- Achillodynia
- Insertion tendinopathy
- Achillobursitis
- Haglund exostosis
- Degenerative changes of the Achilles tendon
- Postoperative use and posttraumatic irritations (e.g., after Achilles tendon repair)

# Actimove® Talobrace

## Comfort Ankle Brace

Comfortable, anatomically shaped stabilizer that secures the upper ankle joint. Special soft, flexible cushioned inner foam padding and elastic upper strap.

- Supports pain relief through the stabilization of the upper ankle joint preventing inversion and eversion.
- High comfort from soft interior foam padding that can be worn directly on the skin.
- Better fit as the elastic upper hook and loop strap fits comfortably over the tibia.
- Great wearing comfort due to specially designed soft, flexible edges.
- Secure feeling due to the anatomically shaped shells offering a high rigidity for increased stability.
- Supports healing by protecting medial and lateral ankle ligaments.
- Allows for normal gait thanks to unrestricted flexion and plantarflexion.
- Easy for patients to apply correctly due to printed foot logo on the bottom of the heel strap.
- Long-lasting, extra durable, easily adjustable heel pad.
- Can be worn in most shoes thanks to the low-profile, light-weight shells.
- Good hygiene as removable foam liner can be washed at 40°C / 104°F. Shells can be wiped with a damp cloth.
- Available for left and right feet.
- Available in two sizes.
- For stock keeping, long shelf life of five years.

This product is intended to stabilize the ankle joint.

**Fields of application include:**

- Ligament and capsule injuries at the upper ankle joint (e.g., ligament ruptures, strains, distortions)
- Slight soft tissue injuries
- Chronic ankle instability
- Rehabilitation and prevention of ankle injuries
- Acute, chronic, and inflammatory edema

## Comfort Ankle Brace

Comfortable, anatomically shaped stabilizer that secures the upper ankle joint, with adjustable air cells for compression and a customized fit. Special soft flexible edges, cushioned inner foam padding and elastic upper strap.

- Supports pain relief through the stabilization of the upper ankle joint preventing inversion and eversion.
- Pre-inflated, adjustable air cells offer compression for a customized fit.
- Great wearing comfort due to specially designed soft, flexible edges.
- Better fit as the elastic upper hook and loop strap fits comfortably over the tibia.
- Secure feeling due to the anatomically shaped shells offering a high rigidity for increased stability.
- Supports healing by protecting medial and lateral ankle ligaments.
- Allows for normal gait thanks to unrestricted flexion and plantarflexion.
- Easy for patients to apply correctly due to printed foot logo on the bottom of the heel strap.
- Long-lasting, extra durable, easily adjustable heel pad.
- Can be worn in most shoes thanks to the low-profile, light-weight shells.
- Good hygiene as liner and shells can be wiped with a damp cloth.
- Available for left and right feet.
- Available in two sizes.
- For stock keeping, long shelf life of five years.

This product is intended to stabilize the ankle joint.

**Fields of application include:**

- Ligament and capsule injuries at the upper ankle joint (e.g., ligament ruptures, strains, distortions)
- Slight soft tissue injuries
- Chronic ankle instability
- Rehabilitation and prevention of ankle injuries
- Acute, chronic, and inflammatory edema

# Actimove® Standard Walker

## Ankle Walker

Walker with circumferential strapping for increased stability.

- Designed to stabilize and protect the lower leg, ankle, and foot.
- Plastic uprights give additional stability by restricting motion of leg.
- Circumferential strapping for increased stability.
- Dense foam lining within the sole to provide comfort and support.
- Shock absorbing sole to minimize impact and improve comfort.
- Rocker bottom to simulate natural gait.
- Lightweight walker for high patient comfort.
- Washable inner sole.
- Available in High (knee-height) or Low (ankle-height).
- Available in five sizes.
- For stock keeping, long shelf life of five years.

The product is designed to stabilize and protect the lower leg, ankle and foot.

Fields of application include:

- Stabilization of fractures of the foot and ankle
- Soft tissue injuries of the lower extremity
- Severe ankle sprains
- Stress fractures of the lower leg
- Postoperative rehabilitation and trauma

# Actimove® Standard Air Walker

## Ankle Walker

Walker with easily adjustable air bladders to help control swelling, with circumferential strapping for increased stability.

- Medial and Lateral Air bladders create a larger surface for contact pressure to help control swelling and ensure a snug fit.
- Designed to stabilize and protect the lower leg, ankle, and foot.
- Plastic uprights give additional stability by restricting motion of leg.
- Circumferential strapping for increased stability
- Dense foam lining within the sole to provide comfort and support.
- Shock absorbing sole to minimize impact and improve comfort
- Rocker bottom to simulate natural gait.
- Integrated pump and valve system designed to easily adjust desired compression level.
- Lightweight walker for high patient comfort.
- Washable inner sole.
- Available in High (knee-height) or Low (ankle-height).
- Available in five sizes.
- For stock keeping, long shelf life of five years.

The product is designed to stabilize and protect the lower leg, ankle and foot.

Fields of application include:

- Stabilization of fractures of the foot and ankle
- Soft tissue injuries of the lower extremity
- Severe ankle sprains
- Stress fractures of the lower leg
- Postoperative rehabilitation and trauma

# Actimove® Closed Shell Air Walker

## Ankle Walker

**Walker with rigid outer shell and circumferential cuff for maximum stability and comfort.**

- Adjustable toe guard provides protection in the toe area.
- Designed to stabilize and protect the lower leg, ankle, and foot.
- Circumferential plastic cuff gives maximum stability and comfort.
- High quality rigid outer skeleton for protection.
- Circumferential strapping for increased stability.
- Dense foam lining within the sole to provide comfort and support.
- Shock absorbing sole to minimize impact and improve comfort.
- Rocker bottom to simulate natural gait.
- Medial and Lateral Air bladders create a larger surface for contact pressure to help control swelling and ensure a snug fit.
- Integrated pump and valve system designed to easily adjust desired compression level.
- Lightweight walker for high patient comfort.
- Washable inner sole.
- Optional, adjustable heel wedge for Achilles' tendon injuries available.
- Available in High (knee-height) or Low (ankle-height).
- Available in five sizes.
- For stock keeping, long shelf life of five years.

**The product is designed to stabilize and protect the lower leg, ankle and foot.**

**Fields of application include:**

- Stabilization of fractures of the foot and ankle
- Soft tissue injuries of the lower extremity
- Severe ankle sprains
- Stress fractures of the lower leg
- Achilles' tendon repairs (only in combination with separately available Actimove® Heel Wedge for Walkers)
- Postoperative rehabilitation and trauma

Optional Heel Wedge.

BACK  
& LUMBAL

Actimove®

# Actimove® Lumbar Sacral Support Comfort

## Additional Support Belt

Comfortable lumbar sacral support in a double-layer design for additional lift and support to the lower back area, available in two heights.

- Helps to reduce pain through stabilization and compression to the lower back area.
- Pain relief through additional compression thanks to the double-layer design.
- Provides additional lift and support to the lower back area thanks to its double-layer design.
- Enhanced stability due to its firm material.
- Enhances proprioception by stabilizing the back to keep an upright posture.
- Contoured fit through its asymmetrical wings.
- Easily adjustable compression thanks to the double-layer design.
- Comfortable to wear even when sitting as four flexible stays help to maintain positioning of the belt.
- Easy application and removal through wrap-around design.
- Customized fit through quick and easy adjustability in a wrap-around design.
- Smooth, durable surface helps to prevent pilling.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C/105 °F wash.
- Suitable for both shorter and taller people as available in two heights.
- Unisex, fits both men and women.
- Available in two heights (except universal sized).
- Available in six sizes, plus a universal size.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and stabilization to the lumbar area.

### Fields of application include:

- Acute and chronic lower back pain
- Degenerative changes in the lumbar area (e.g., osteoporosis, osteochondrosis, spondylosis, spondylarthrosis, facet syndrome)
- Lumbar instabilities (insufficiencies of muscles and ligaments, sprains and strains)
- Lumbar disc protrusion
- Post-traumatic and post-operative use (e.g., after intervertebral disc operations)
- Prevention of repetitive strain injuries

# Actimove® Lumbar Sacral Support Comfort

## Additional Support Belt, Pressure Pad

Comfortable lumbar sacral support with a repositionable pressure pad for a massage effect for improved blood circulation and relief of muscular tension.

- Helps to reduce pain through stabilization and compression to the lower back area.
- Pain relief through additional compression thanks to the double-layer design.
- Provides additional lift and support to the lower back area thanks to its double-layer design.
- Relieving massage effect through repositionable pressure pad.
- Good blood circulation and relief of muscular tension through massaging effect of the pressure pad.
- Meets individual patient needs through the repositionable, removable pressure pad.
- Enhances proprioception by stabilizing the back to keep an upright posture.
- Easily adjustable compression thanks to the double-layer design.
- Comfortable to wear even when sitting as four flexible stays help to maintain positioning of the belt.
- Easy to apply and close thanks to the practical finger loop on the main belt.
- Easy application and removal through wrap-around design.
- For better comfort, designed with breathable, spacer-fabric back panel.
- Customized fit through quick and easy adjustability in a wrap-around design.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Unisex, fits both men and women.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C/105 °F wash.
- Available in six sizes at a 25 cm/10" height.
- For stock keeping, long shelf life of five years.

This product is intended to provide support and stabilization to the lumbar area.

### Fields of application include:

- Acute and chronic lower back pain
- Degenerative changes in the lumbar area (e.g., osteoporosis, osteochondrosis, spondylosis, spondylarthrosis, facet syndrome)
- Lumbar instabilities (insufficiencies of muscles and ligaments, sprains and strains)
- Lumbar disc protrusion
- Post-traumatic and post-operative use (e.g., after intervertebral disc operations)
- Prevention of repetitive strain injuries

## Back Support with Pressure Pad

Back support featuring 3D knitting technology and award-winning Helix design that stabilizes the lower back area and supports pain relief through circumferential compression and removeable pressure pad.

- Supports pain relief by stabilizing the lower back through the specially designed 3D flat-knitted fabric, providing circumferential compression for increased intraabdominal pressure supporting the dorsal muscles.
- Added relief by providing a massage effect for better blood circulation and relief of muscular tension through the adjustable and removable lumbar silicone pressure pad.
- Enhances proprioception, supports correct posture, and provides warmth to the lower back area.
- Easy and secure to open, close and adjust thanks to the specially designed two-pocket closure system.
- Enhances patient compliance by providing a good anatomical fit.
- Good patient comfort through the skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Ensures correct application as the care label indicates the top of the support.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30 °C/85 °F gentle wash cycle after removal of the pressure pad.
- Available in five sizes.
- Available in white and charcoal.
- For stock keeping, long shelf life of five years.

This product is intended to provide stabilization to the lumbar area.

Fields of application include:

- Acute and chronic lower back pain
- Degenerative changes in the lumbar area (e.g. osteoporosis, osteochondrosis, spondylosis, spondylarthrosis, facet syndrome)
- Lumbar instabilities (insufficiencies of muscles and ligaments)
- Post-traumatic use
- Prevention of repetitive strain injuries

## Back Support with Pressure Pad

**Back support, especially designed for women, featuring 3D knitting technology and award-winning Helix design that stabilizes the lower back area and supports pain relief through circumferential compression and removeable pressure pad.**

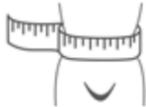

- Supports pain relief by stabilizing the lower back through the specially designed 3D flat-knitted fabric, providing circumferential compression for increased intraabdominal pressure supporting the dorsal muscles.
- Special fit for women thanks to design that reflects the female waist-hip ratio.
- Added relief by providing a massage effect for better blood circulation and relief of muscular tension through the adjustable and removable lumbar silicone pressure pad.
- Enhances proprioception, supports correct posture, and provides warmth to the lower back area.
- Easy and secure to open, close and adjust thanks to the specially designed two-pocket closure system.
- Enhances patient compliance by providing a good anatomical fit.
- Good patient comfort through the skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Ensures correct application as the care label indicates the top of the support.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30 °C/85 °F gentle wash cycle after removal of the pressure pad.
- Available in five sizes.
- For stock keeping, long shelf life of five years.

**This product is intended to provide stabilization to the lumbar area.**

**Fields of application include:**

# Actimove® Deluxe Lumbar Sacral Support

Rigid Panel, For Women

**Stabilizes the lumbar region through circumferential compression, paired with a rigid anatomically-shaped back panel and stays, designed for women by women.**

- Helps to relieve lower back pain and supports healing through warmth and circumferential compression.
- Stabilizes the lumbar region thanks to circumferential compression and the rigid anatomically-shaped back panel combined with six rigid stays.
- Helps alleviate back pain by supporting abdominal muscles.
- For adjustable support, back panel can be removed.
- Designed for women by women.
- Premium comfort and good breathability through the extra soft fabric.
- Especially comfortable for women due to the female anatomical shape.
- Discreet wearing comfort under clothing due to its low-profile.
- Comfortable to wear, even when sitting, as flexible stays maintain positioning.
- Specially designed for women, with unique fashionable colors.
- Silky binding for a feminine touch.
- Easy to use thanks to the thumb loops and micro-hook and loop closure.
- Neoprene-free.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- For hygiene, hand-washable at 30°C / 85 °F.
- Available in lavender and rose.
- Available in eight sizes.

**This product is intended to stabilize the lumbar sacral region to help relieve lower back pain and discomfort.**

**Fields of application include:**

- Muscle strain
- Lower back pain and discomfort
- Lumbar spine sprain/strain
- Mild lumbar instability
- Lumbar disc dysfunction

# Actimove® LO•PLUS™ Lumbar Support

## Stabilizing Posterior Panel

Lumbar Support with stabilizing, rigid posterior panel, with tapered elastic panels for compression and support.

- Helps to relieve lower back pain and discomfort by supporting and stabilizing the lumbar region with the help of the rigid posterior panel.
- For compression and support, tapered elastic panels contour the body.
- For great comfort, neoprene-free, and made with soft padded lining.
- Easy, quick application, fully adjustable with simple hook-and-loop closure system.
- Neoprene-free.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- For hygiene, hand-washable at 30°C/85°F.
- Available in six sizes.

This product is intended to provide stability to the lumbar region to relieve lower back pain and discomfort.

**Fields of application include:**

- Occasional/chronic back pain
- Lumbar Sprains/Strains
- Lumbar Instability
- Muscle Weakness

# SHOULDER

## Actimove® Sling Comfort

### Arm Sling – Single Pack

Comfort arm sling for a stable and supported forearm, fully assembled and pre-cut for a fast application.

- Secure, one-size-fits-all forearm support in a customizable strap length.
- Good patient wearing comfort due to the complete, open construction and reduced neck pressure through the 5.5 cm wide and stable sling replacing a separate neck pad.
- Quick and easy to apply or remove with one hand thanks to the hook and loop Y-tabs, with one already attached.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 40 °C / 105 °F.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the arm, elbow and shoulder.

**Fields of application include:**

- Postoperative use (e.g. after rotator cuff rupture)
- Fracture management (e.g. clavicle, scapular, humeral, and greater tuberosity fractures)
- Joint distortions (sprains) and dislocations (e.g. acromioclavicular & sternoclavicular dislocations, shoulder luxation)
- Inflammatory diseases (e.g. calcific tendinitis of the rotator cuff)
- Minor instability of the shoulder (e.g. dorsal instability)
- Support for hemiplegic patients
- Support while wearing a cast or splint
- Temporary arm stabilization in emergency/paramedic care

# Actimove® Mitella Comfort

## Comfort Arm Sling

**Comfort shoulder, elbow and arm support limiting the range of motion in the shoulder and elbow joint and providing rest in a flexed elbow position.**

- Easy to apply, adjust or remove with one hand thanks to the hook and loop Y-Tabs and open-and-close pocket design.
- For good patient wearing comfort, reduced neck pressure though the 5.5 cm wide and stable sling replacing a separate neck pad.
- Helps to relieve pain by stabilizing the shoulder joint and keeping the flexed elbow in a pocket which limits the range of motion.
- Secure to wear, as the hand positioning through the thumb loop limits the rotation of the forearm, keeping it safe in the pocket while still allowing full finger movement.
- Patient comfort thanks to the breathable pocket material.
- Convenient for follow up exams, as product does not need to be removed prior to taking x-rays.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 40°C / 105°F.
- Available in four sizes.
- For stock keeping, long shelf life of five years.

**This product is intended to provide support to the arm, elbow and shoulder.**

**Fields of application include:**

- Postoperative use (e.g. after rotator cuff rupture)
- Fracture management (e.g. clavicle, scapular, humeral, and greater tuberosity fractures)

# Actimove® Umerus Comfort

## Comfort Shoulder Immobilizer

Comfort shoulder and upper arm immobilizer for limited movements in the shoulder joint.

- Helps to relieve pain by immobilizing the shoulder joint and limiting the abduction, extension, internal and external rotation of the humerus.
- Improved shoulder stabilization through the waist strap.
- Secure, as the hand positioning through the thumb loop limits the rotation of the forearm, keeping it safe in the pocket while still allowing full finger movement.
- For an individual fit, suitable for most patients thanks to the adjustable waist and shoulder straps.
- Easy to apply, adjust or remove with one hand thanks to the hook and loop Y-Tabs and open-and-close pocket design.
- For good patient wearing comfort, reduced neck pressure though the 5.5cm wide and stable sling replacing a separate neck pad.
- Patient comfort thanks to the breathable pocket material.
- Convenient for follow up exams, as product does not need to be removed prior to taking x-rays.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 40°C / 105°F.
- Available in five sizes.
- For stock keeping, long shelf life of five years.

This product is intended to provide support to the arm, elbow and shoulder.

Fields of application include:

- Postoperative use (e.g. after rotator cuff rupture)
- Fracture management (e.g. clavicle, scapular, humeral, and greater tuberosity fractures)
- Joint distortions (sprains) and dislocations (e.g. acromioclavicular & sternoclavicular dislocations, shoulder luxation)
- Inflammatory diseases (e.g. calcific tendinitis of the rotator cuff)
- Minor instability of the shoulder (e.g. dorsal instability)
- Support for hemiplegic patients

# Actimove® Shoulder Abduction Sling

## Shoulder Immobilizer

### Easy to handle shoulder immobilization.

- Easy to apply and to remove, even with one hand, thanks to the stable snap-lock buckle connecting the strap with the pocket, and the quick release buckle attached to the waist strap.
- Designed to aid pain relief through shoulder immobilization at the upper-arm abduction at around 15°.
- Secure and tailored fit for most patients through the extra-long waist strap of which can be adjusted in length.
- Increased comfort through the adjustable padded neck strap reducing the pressure on the neck.
- For increased patient comfort during prolonged wear as the perforated material allows for breathability.
- Brings comfort during wear due to the soft outer and inner materials, edges and seams.
- Helps to maintain muscle strength through hand and arm muscle training exercises using the attached squeeze ball.
- Clothes are protected through the soft, supple and color fast material.
- Dirt and signs of wear are less visible due to the black inner lining of the arm pocket.
- For easy care and a hygienic wearing experience, can be machine washed at 40°C.
- Convenient during medical check-ups through radiolucency.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Universal, right or left fit, eliminates the need for excess stock.
- Available in four sizes.
- For stock keeping, long shelf life of five years.

**This product is intended to provide support to the arm, elbow and shoulder.**

**Fields of application include:**

- Minor instability of the shoulder (e.g., dorsal instability)
- Postoperative use (e.g., after rotator cuff rupture)
- Joint dislocations (e.g., shoulder luxation)

## CERVICAL

## Actimove® Cervical

Cervical Collar Soft Density, Narrow Width

## Actimove® Cervical

Cervical Collar Soft Density, Regular Width

Soft-density, comfortable cervical support

- Provides gentle head and neck support, restricting neck range of motion.
- Holds the head in a stable position thanks to the pre-formed anatomical shape.
- Support of the cervical spine after circular application.
- Reliable support due to the durable materials.
- Comfortable wear through the high-quality, soft-density foam.
- For added comfort covered with a soft lining.
- Easy to apply and adjust hook and loop closures.
- Suits most patients due to the variety in neck sizes covered.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes, including a universal size.

The product is intended to provide support of the cervical spine after circular application, to help hold the head in a stable position and to restrict the neck range of motion.

Fields of application may include:

- Degenerative disorders in the cervical area
- Minor cervical trauma
- Post-Operative Use
- Painful cervical syndrome
- Cervical migraine
- Minor ligament injury
- Cervical Strain
- Short-term use after whiplash.

# Actimove® Cervical Comfort\*

## Comfort Cervical Collar

Comfortable cervical collar in a pre-formed anatomical shape with a soft, navy foam cover.

- Provides comfortable head and neck support, restricting range of motion.
- Easy to apply and adjust hook and loop closures.
- Holds the head in a stable position thanks to the pre-formed anatomical shape.
- Good patient comfort due to the soft foam cover.
- Maintains a cleaner look during wear thanks to its attractive navy-blue design.
- Suits most patients due to the variety in neck sizes covered.
- Caution: This product contains natural rubber latex which may cause allergic reactions.
- For extra hygiene and to keep the collar clean, the removable sleeve can be machine washed at 30°C/85°F.
- Available in six sizes, including a short height version in XL.
- For stock keeping, long shelf life of five years.

The product is intended to provide support/stabilization to the cervical area.

**Fields of application include:**

- Short-term use after whiplash
- Degenerative changes in the cervical area (e.g., osteochondrosis, spondylarthroses, minor cervical arthrosis)
- Cervical migraine
- Sprains
- Strains
- Acute and chronic painful cervical syndrome
- Muscular pain syndrome
- Minor cervical trauma
- Immediate treatment of acute cervical fractures
- Postoperative use

\*Caution: This product contains natural rubber latex which may cause allergic reactions.

Actimove®

# Actimove® Abdominal Binder

Three-Panel

# Actimove® Abdominal Binder

Four-Panel

**Abdominal binder that helps to reduce pain and supports wound healing through constant individual compression around the abdomen after surgery or trauma, breathable, available in two heights.**

- Helps to reduce pain through support to the injured area post-operatively.
- Helps to reduce pain through individually adjustable compression.
- Provides support and relief to the abdomen after surgery and trauma through compression.
- Helps to support wound healing through constant individual compression around the abdominal area.
- Helps to perform pulmonary exercises through the elastic material.
- For better comfort, made from breathable materials.
- More flexible and conforming fit through special, soft connectors between the panels.
- Comfortable against the skin thanks to its inner, soft, plush material.
- Customized fit due to wide range of adjustability in a wrap-around design.
- Easy application and removal through wrap-around design.
- Anatomical fit through V-shape.
- Helps to avoid skin maceration through non-absorbing, cotton-free materials.
- Supports a wide range of medical applications (e.g., drainage tubes, ostomy bags) as materials will not unravel when cut.
- Easy wound inspection due to fast opening and closure of belt.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C/105 °F wash.
- Unisex, fits both men and women.
- Actimove Abdominal Binder, Four-Panel: Suitable for taller patients, or longline surgeries, thanks to high four-panel design.
- Available in four sizes, the Actimove Abdominal Binder Three-Panel at a height of 23 cm / 9" and the Actimove Abdominal Binder Four-Panel at a height of 30 cm / 12".
- For stock keeping, long shelf life of five years.

**This product is intended for abdominal support.**

**Fields of application include:**

- Postoperative and posttraumatic use
- Relief of the abdomen and thorax

## Soft Pad

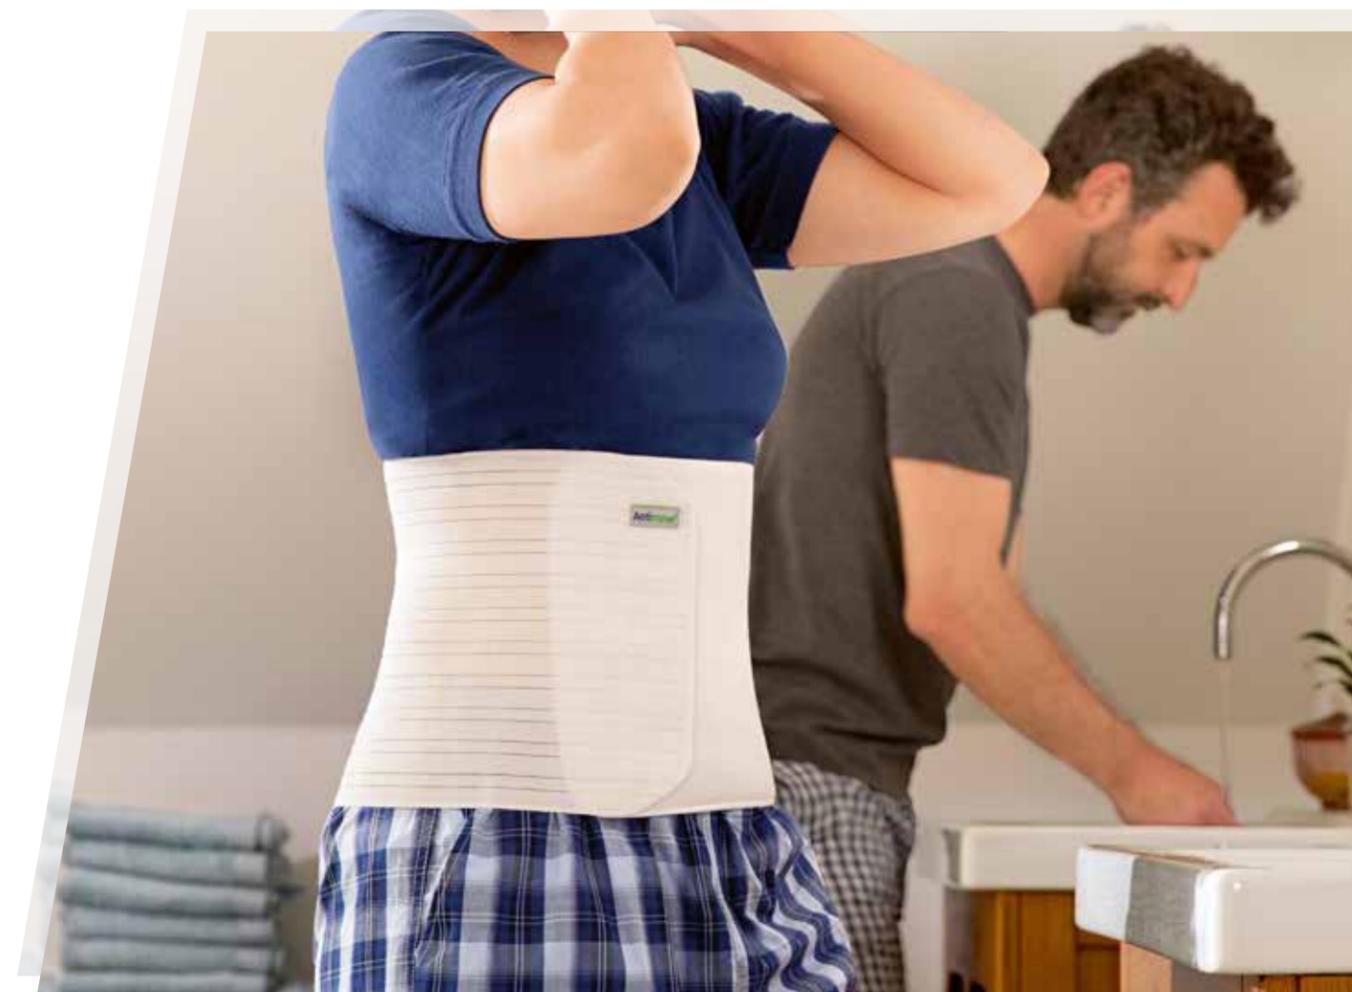

**Comfortable abdominal binder with soft foam pad for extra cushioning to the injured area. Helps to reduce pain and supports wound healing through constant individual compression around the abdomen after surgery or trauma, available in two heights.**

- Helps to reduce pain through support to the injured area post-operatively.
- Helps to reduce pain through individually adjustable compression.
- Provides support and relief to the abdomen after surgery and trauma through compression.
- Helps to support wound healing through constant individual compression around the abdominal area.
- Helps to perform pulmonary exercises through the elastic material.
- Enhanced wearing comfort due to extra cushioning from the soft foam pad to help protect the injured area.
- Enhanced wearing comfort due to extra cushioning of the injured area through terry-cloth lined, soft foam pad.
- Enhanced wearing comfort thanks to its breathable and soft materials.
- Easy application and removal through wrap-around design.
- Easily applied and removed thanks to the velvety, hook-compatible outer surface of pad.
- Customized fit due to wide range of adjustability in a wrap-around design.
- Helps to avoid skin maceration through non-absorbing, cotton-free materials.
- Supports a wide range of medical applications (e.g., drainage tubes, ostomy bags) as materials will not unravel when cut.
- Easy wound inspection due to fast opening and closure of belt.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40°C/105°F wash.
- Unisex, fits both men and women.
- Suitable for both shorter and taller patients, or longline surgeries, as available in two heights.
- Available in five sizes.
- For stock keeping, long shelf life of five years.

**This product is intended for abdominal support.**

**Fields of application include:**

- Postoperative and posttraumatic use
- Relief of the abdomen and thorax

# Actimove® Rib Belt

Two-Panel, For Men

Low-profile, breathable rib belt providing external support and individually adjustable compression with an anatomical fit.

- Helps to reduce pain through individually adjustable compression.
- Helps to reduce pain giving external support to the injured rib area.
- For pain management, elastic material provides compression through limiting expansion of the rib cage.
- For better comfort, made from breathable materials.
- More flexible and conforming fit through special, soft connectors between the panels.
- Comfortable against the skin thanks to its inner, soft, plush material.
- Easy application and removal through wrap-around design.
- Customized fit due to wide range of adjustability in a wrap-around design.
- Inconspicuous wear due to its low-profile design.
- Helps to avoid skin maceration through non-absorbing, cotton-free materials.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C/105 °F wash.
- Available in two sizes, including a universal size.
- For stock keeping, long shelf life of five years.

This product is intended to support and stabilize the rib area.

Fields of application include:

- Rib fracture
- Post-traumatic conditions in the rib area (e.g., bruising)

	Code	Size	Measurements	Unit
	7550804	S	23 1/2" – 35 1/2" 60 – 90 cm	1 Rib Belt

# Actimove® Rib Belt

Two-Panel, For Women

Low-profile, breathable rib belt providing external support and individually adjustable compression with an anatomical, female fit.

- Helps to reduce pain through individually adjustable compression.
- Helps to reduce pain giving external support to the injured rib area.
- For pain management, elastic material provides compression through limiting expansion of the rib cage.
- For better comfort, made from breathable materials.
- More flexible and conforming fit through special, soft connectors between the panels.
- Comfortable against the skin thanks to its inner, soft, plush material.
- Easy application and removal through wrap-around design.
- Customized fit due to wide range of adjustability in a wrap-around design.
- Enhanced comfort and improved fit through the bust line contour.
- Discreet wear thanks to its low-profile design.
- Helps to avoid skin maceration through non-absorbing, cotton-free materials.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at a gentle 40 °C/105 °F wash.
- Available in two sizes, including a universal size.
- For stock keeping, long shelf life of five years.

This product is intended to support and stabilize the rib area.

Fields of application include:

- Rib fracture
- Post-traumatic conditions in the rib area (e.g., bruising)

# ELBOW

Actimove®

# Actimove® EpiMotion

## Elbow Support

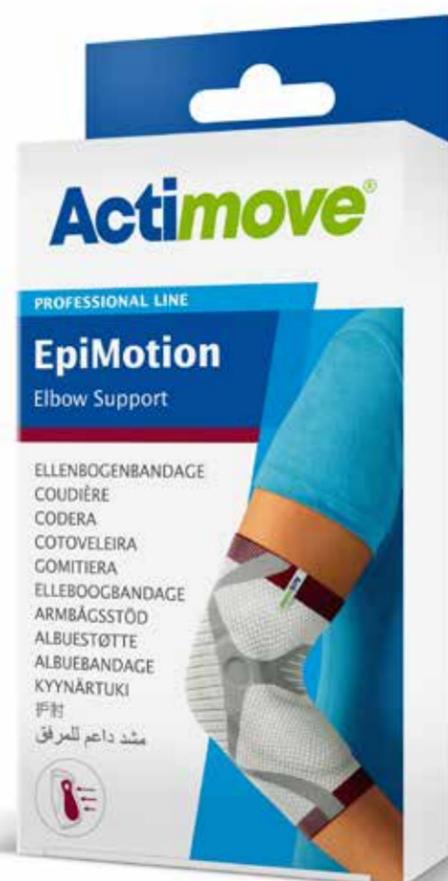

Anatomically shaped elbow support featuring 3D knitting technology and award-winning Helix design for gradient medical compression, providing stability, and integrated pressure pads to help pain relief.

- Helps pain relief, as the support offers stability through the anatomical shape and the 3D flat-knitted structure, providing gradient medical compression.
- Contributes to pain relief and healing by reducing edema, through targeted pressure and an intermittent massage effect thanks to the two anatomically shaped ulnar and radial pressure pads.
- Prevents further pressure peaks on bony prominences thanks to the epicondyle cut-outs in the pressure pads.
- For more wearing comfort especially designed soft Motion-Comfort-Zone smooth fit in the elbow crease.
- Anti-slip for pressure-reduced distal and proximal cuffs without an elastic band preventing constriction.
- Seamless look thanks to the fusion technology used for the integration of the pressure pads.
- Skin-friendly and breathable 3D knit using OEKO-TEX® certified combination of yarn materials.<sup>1</sup>
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 30°C/85°F gentle wash cycle.
- Available in seven sizes.
- For stock keeping, long shelf life of five years.

This product is intended for elbow support.

Fields of application include:

- Tennis elbow (lateral epicondylitis)
- Golfers Elbow (medial epicondylitis)
- Arthritis (joint inflammation)
- Arthrosis
- Rheumatoid joint effusion
- Bursitis olecrani (student's elbow)
- Insertion tendopathy of the triceps brachii
- Posttraumatic irritations
- Postoperative use

Elbow Clasp, Adjustable

**Low-profile anatomically shaped elbow clasp for adjustable, targeted muscle and tendon pressure with a secure and comfortable fit.**

- Relieves pain through individual and targeted dual compression on the radial and ulnar elbow tendons achieved by the anatomically shaped clasp and the adjustable VELCRO® brand<sup>1</sup> hook and loop strap.
- Optimal fit as the anatomically shaped clasp aligns to the natural form and allows physiological movements of the elbow.
- Inconspicuous to wear, as the low-profile design allows a smooth silhouette under shirt sleeves.
- Stays in place and comfortable to wear during sports, like tennis and golf, as well as everyday activities, thanks to the soft, non-slip inner liner.
- Easy one-handed application thanks to the elastic VELCRO® brand straps and buckle closure.
- Easy to keep clean for better hygiene, as the VELCRO® brand strap can be removed for cleaning and the clasp wiped down.
- Long-lasting, made from elastic, durable and flexible materials.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.
- For stock keeping, long shelf life of five years.

This product is intended to support the elbow.

Fields of application include:

- Tennis elbow (lateral epicondylitis)
- Golfers' elbow (medical epicondylitis)

## THIGH & CALF

# Actimove® PowerMotion

## Thigh Support

Patented thigh support providing circular, gradient compression with a unique Y-shape strap design simulating professional taping techniques.

- Aids pain relief and enhances healing by stimulating blood circulation through the unique Y-shaped strap design providing additional adjustable compression.
- Helps to reduce edema and enhances pain reduction by simulating taping techniques normally used for strains and fiber ruptures of the calf muscle.
- Promotes injured thigh muscle regeneration by controlling its elongation through targeted compression and Y-shaped straps.
- Comfortable to wear over the highly sensitive injured area thanks to the specially designed 3D flat-knitted Pressure-Relief-Zone.
- Secure fit due its anatomical shape and adjustable straps. Fast and easy to apply for the patient when compared to professional taping techniques, thanks to the individually adjustable closure strapping system.
- Provides patient comfort thanks to the breathable materials.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy to clean for better hygiene, machine washable at 40 °C/105 °F gentle wash cycle.
- Available in five sizes.
- Protected by patent, for more info visit: [www.essity.com/patents](http://www.essity.com/patents)
- For stock keeping, long shelf life of five years.

This product is intended for thigh support.

Fields of application include:

- Muscle strain and impact bruising
- Minor muscle fiber tears
- Myogelosis of the hamstring or quadriceps muscle

## Actimove® Athletic Supporter

Comfortable protection for men during athletic activities.

- Comfortable support and protection during athletic, strenuous activities thanks to the stretchy pouch material.
- For more comfort, made with a wide, elastic waistband and soft, non-binding leg straps.
- For hygiene, hand-washable at 30°C/85°F.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in four sizes.

**Purpose:**

- All day protection and support. Suitable during sports and strenuous activities.

# Actimove® Hernia Support

## Support Belt

Single or double hernia support, wearable over undergarments.

- Helps to relieve pain as specially designed pressure pads provide targeted support to reduce inguinal hernias.
- Suitable for single or double hernias thanks to the removable right and left pads.
- Flexible, removable foam cushions designed to provide gentle, comfortable compression on the hernias.
- Easily adjustable for desired compression and fit thanks to its elastic waist band.
- For patient comfort, can be worn on top of underwear.
- For more comfort, adjustable design without metal buckles, nor snaps.
- For skin comfort, made with a soft, plush lining.
- For individual fit, made with adjustable leg straps.
- Inconspicuous wear under most clothing thanks to its neutral beige color.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Easy hygiene, hand, or machine washable in cold water with mild soap.
- Available in three sizes.

The product is intended to provide adjustable compression to inguinal hernias.

Fields of application include:

- Reducible single or double inguinal hernias

	Code	Size	Measurements	Color	Unit
	7455910	S	30" - 35" 76 - 89 cm	Beige	1 Hernia Support Belt

# Actimove® Hernia Support

## Support Brief

Single or double hernia support, wearable like underwear.

- Helps to relieve pain as specially designed pressure pads provide targeted support to reduce inguinal hernias.
- Flexible, removable foam cushions designed to provide gentle, comfortable compression on the hernias.
- Ideal amount of focused compression can easily be increased or decreased thanks to the adjustable straps.
- Suitable for single or double hernias thanks to the removable right and left pads.
- Individual support due to easily adjustable compression.
- For patient comfort and ease of wear combines underwear and hernia support in one.
- Extra wearing comfort from the soft, plush padding of the waistband.
- Comfortable, customized fit by adjusting the hook and loop straps.
- For comfort, made with soft, smooth materials.
- Inconspicuous wear under most clothing thanks to its low-profile design.
- For hygiene, hand-washable at 30°C / 85°F.
- Suitable for those sensitive to latex, as this product is not made with natural rubber latex.
- Available in five sizes.

The product is intended to provide adjustable compression to inguinal hernias.

Fields of application include:

- Reducible single or double inguinal hernias
